## Mountain View Road Program

At the last meeting of Mountain View municipality the program of roadwork was the principal topic of discussion.

It was decided that at least thirty miles of road should be graded by the elevator-grader, and five miles will be graded in each of the six divisions.

It was arranged that the road crew work in two shifts in order that the work could be done in good season so as to allow the road to be settled before the heavy hauling in the fall.

The caterpillar tractor has been overhauled and work commenced on Tuesday morning, the first road to be graded being the road south of the Rosebud bridge.

On petition from a number of farmers it was decided to suspend the enrollment of stallions until January 1st, 1935.

It was decided to cancel a diversion at the E½ of sec. 17-33-27-4. Councillor W. J. McCoy and Mr. A. Brasso were appointed a committee to interview the Didsbury Fish and Game Association with regard to pest control.

A by law was passed authorizing the granting of a 10% discount on taxes paid on or before May 31st, and 7% on taxes paid on or before August 31st.

Matters of relief were discussed, and the passing of accounts comprised the balance of the meeting.

## School Fair Concert Outstanding Success

The concert and dance held at the Community Hall last Friday evening was an outstanding success. A large audience gathered to witness a program given by the pupils of Rosebud, Grand Centre, Neapolis, Mona, and Julland schools.

There were several short plays, drills, recitations and musical numbers, each of which were greeted with sustained applause. The teachers were complimented on the excellence of their respective presentations.

After the program lunch was served. This was followed by a dance, the music being supplied by Halliday's Orchestra.

The school fair committee reports that with the financial aid received they will be able to carry on their work the coming year.

## Leaves for Great Bear Lake

Mr. Frank Moyle leaves this week for Great Bear Lake. He will join a party from High Prairie and they will leave Peace River Landing in a scow they have built and float down the Peace River to Fort Norman and from there to Great Bear Lake. Mr. Moyle expects to get a position on his arrival at the mining field at Great Bear Lake.

## Subscriptions to the Band.

Any other subscriptions would be appreciated.—Thank you.

## WEEKLY JOKE

Telegram to a friend:  
"Washout on line—cannot come."  
Reply:  
"Come anyway—borrow a shirt."

## Last Debenture is Paid Off

The town secretary reported at the council meeting that the last debenture payment had been made and that the Town of Didsbury had now no debenture indebtedness.

The debenture just paid off was sold in 1914 and used for the purchase of the electric light plant.

With the payment of this debenture Didsbury is in the fortunate position of being completely out of debt and has a very respectable balance in the treasury.

## Hospital "Aid" will be Organized

A Hospital Aid Society will be organized at a meeting to be held at the United Church on Saturday, June 2nd at 2 p.m.

A society of this kind can be of great help to the Hospital in sewing and providing fruit, vegetables, etc., as well as furnishings.

We understand that two representatives from each ladies organization both in town and country have been appointed to attend this meeting, but all ladies who are at all interested in this work are invited to attend.

## Boys' Band at Olds Today, the 24th

The Didsbury Boys' Band will go to Olds today (Thursday) to take part in the parade in the May 24th celebration.

## WEEKLY SERMONETTE

We can only see a little of the ocean  
A few miles distance from the rocky shore;  
But out there beyond—beyond our eyes' horizon  
There's more—there's more.

We can only see a little of God's loving  
A few rich rich treasures from His mighty store;  
But out there beyond—beyond our eyes' horizon  
There's more—There's more.

At Didsbury

## "Stop" Streets will be Established in Didsbury

Legislation enacted at the last session of the provincial legislature empowered the towns and villages to stop streets within the municipal areas, and in view of the fact that the Calgary-Edmonton highway goes through the town the secretary was instructed at the meeting of the council held Monday evening to draft a by-law establishing "stop" streets in town, to be presented at the next meeting.

The question of reckless driving through the town was also discussed and it was decided to ask the Mounted Police to make a check-up.

Adjutant Waterston of the Salvation Army, and Major Watts of the Alberta Institute for the Blind, appeared before the council asking for grants in aid of their institutions. The matter of the grants was left over until the next meeting of the council.

The public works committee reported that it was their intention to build cement sidewalks on Main Street from the X.L. Motors to the Ad-hoc Garage, and on Osier Street from the hotel to the telephone office. It was also intimated that several wooden sidewalks would be renewed or repaired.

## EVANGELICAL NOTES

The sermon at the Evangelical church service on Sunday morning will be delivered by the Rev. W. W. Krueger, D. S. Regina, and will be followed by observance of the Lord's Supper.

The 4th quarterly conference of the Didsbury circuit of the Evangelical Church will be held at the home of Mr. and Mrs. J. V. Berscht on Friday (tomorrow) evening, May 25.

## The Band Concert.

The interest taken by the general public in the Didsbury Boys' Band was evidenced by the large attendance at the concert given by the Band on Friday evening.

The performance of the Band more than came up to the expectations of the audience, and every selection was accorded well-merited applause.

The boys of the Band and their director, Mr. H. C. Lowmer, are to be complimented on the splendid progress made during the winter months.

A reading by Mrs. Hugot; songs by Messrs. Jack and Alex. Robertson, and violin solo by Miss Mildred Levanagood, accompanied by her sister Miss Joyce, rounded out a very enjoyable concert.

## Tennis League Formed.

Representatives from the tennis clubs of Olds, Didsbury, Carstairs and Crossfield, met recently and organized a league and arranged a schedule for the summer.

It was decided that each club would entertain each of the other clubs at least once during the season.

The following schedule was arranged:

June 3	Didsbury at Olds
	Carstairs at Crossfield
June 13	Didsbury at Carstairs
	Olds at Crossfield
June 24	Crossfield at Didsbury
	Carstairs at Olds
July 11	Crossfield at Carstairs
	Olds at Didsbury
July 22	Carstairs at Didsbury
	Crossfield at Olds
Aug. 1	Didsbury at Crossfield
	Olds at Carstairs

## Keeping Up Quality!

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its services to farmers in handling their grain and furnishing them with farm supplies.

## A Record Of Service

Forty-four years as member of any parliament, even in the inconspicuous role of a back-bencher, would be an impressive record of service and endurance. It would indicate, at the very least, a tremendous capacity to resist boredom and endure platitudes.

Forty-four years as member of the British parliament, where the M.P.'s job is pretty much a full-time affair, is almost a transcendent feat, for, at Westminster, oratorical standards differ but little from those of parliaments and legislatures nearer home.

Forty-four years as member of the British parliament, thirty of them in the very forefront of polemical politics, twenty of them in the role of an impartial as well as a national figure, and, at least ten of them as a world summary, represents something, however, which cannot be judged by ordinary criteria.

Forty-four years as member of the British parliament, during eighteen or so as a member of the cabinet and six of them spent as war-time premier, the dynamic centre of a whirling world—that is the consummate achievement which fell to the lot of a little Welsh lawyer.

David Lloyd George? Perhaps it was unnecessary to mention the name for, were it posed to any group of intelligent citizens within the British empire, it is doubtful if the juxtaposition of "forty-four years" with "war-time premier" in the question, would fail to elicit the right answer.

David Lloyd George has just celebrated his forty-fourth year as member of the British parliament. In that long term, the little Welsh lawyer who entered the portals of the "Mother of Parliaments" with none of that political background which, prior to his advent, was deemed essential to ministerial rank, has run the full gamut of political achievement; has scaled the dizzy heights and been dashed from them; has tasted the sweet fruits of popular acclaim and the bitter of obloquy. Speculative always, in success as in defeat, his is perhaps the most amazing personality in its very contradictions of a generation replete with outstanding figures.

Today, in the quieter nooks of political life, the old fires burn dimmer but they still burn. The flash of those "limehouse" days which added a word to the English language is recalled, ever and anon, as he asseverates warnings and belabors a heedless world heads not. From the couch of the prophet, or the desk of the mentor, he sallies, occasionally, to guide and to counsel those who caught in the full flood of the stream, pay little attention to what adulterates the stiller eddies of the backwaters. In sickness or in health, one word of continuity brings the old fires forth. Dove still can thunder—obligations!

His attendance at sittings of parliament is rarer than it used to be, but a strange reaction follows his periodic entries. Be the debate never so dull, when Lloyd George appears members rush themselves from lethargy and prepare for action. Impenetrably, a ripple animates the house, electricity is in the air. Lloyd George has entered! Surely here, despite the fact a whirling world has thrown him from the vortex, is anything but a spent force.

Two or three weeks ago, he celebrated the forty-fourth anniversary of his election to parliament. If he were asked what is his fondest recollection over all those years, undoubtedly, his answer would be: it had been given him to retain the respect, the loyalty, the confidence and the affection of his own constituency of Glamorgan. That is, perhaps, the most amazing feature of his amazing record. For forty-four years he has enjoyed the unbroken loyalty of his constituents. For forty-four years he has enjoyed their confidence, their respect and their affection. Surely no man could ask more. That is the mood of his service and the gauge of his success.

## Ease Pain, Headache in Few Minutes

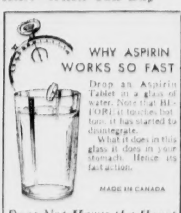

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest relief it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate the moment it is put in water. And this is ready to do so at any time.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer is in the form of a cross is on every tablet of Aspirin.

## Wizard At Illumination

Nova Scotia Man Planned Many Spectacular Lighting Effects

Walter D'Arcy Ryan, famous creator of lighting effects and director of the illuminating engineering laboratory at the Schenectady works of the General Electric Co., died recently of a heart attack at his home in Schenectady.

Born in Kentville, Nova Scotia, 63 years ago, the son of the late ex-Mayor and Mrs. J. W. Ryan, Walter Ryan had for many years been known as the "Wizard" of illumination.

He was the man who had outshone the Aurora Borealis or the scintillating stars of a moonlight night with electrical effects of his own devising. For instance, the illuminating of Niagara Falls, the magnificent lighting effects of the Panama Pacific Exposition in San Francisco; those of the Exposition in Rio Janeiro, Brazil; the Washington Arms Conference; the Silver Jubilee of the City of New York; the Armistice of Victory in Chicago; the Republic Eagle Sunburst, during the National Convention in Kansas City, and his most marvellous achievement of all, the lighting of the 1933 World's Fair in Chicago.

Of this Nova Scotia-born engineer, Thomas A. Edison once said: "This man Ryan has performed miracles."

## Japan's Rivalry May

Cut Living Standard

American Diplomat Says Competition Hard To Cope With

Japan's commercial rivalry ultimately may result in a lower standard of living throughout the world, Richard Washburn Child, American diplomat, said.

Child, in Europe as President Roosevelt's special representative to study and improve trade conditions, said he had come to the conclusion during his two week's study in Great Britain—first stop on his trade tour.

He admitted that at present he discerned no means of coping with the increased commercial rivalry of the Japanese, with their lower wage scales and production costs, which threatens to wreck the English textile trade abroad, including India.

"My British friends told me that they believe the Japanese technical efficiency is at least on a level a force in enhancing Japanese competition as lower wages and their living standard," he added.

## Safety Of Mail Bags

England Lost Only One Out Of 10,000,000 Last Year

Only one of more than 40,000,000 mailbags, each containing an average of 5,000 letters, had come to grief last year in Britain up to the end of October. And that bag contained no money of value. A few years ago the average number of mailbags stolen in a year was more than 60, while there were frequent attacks on officials in isolated post offices. There have been few such attacks this year—none of them successful. A reorganization scheme involving close co-operation between Scotland Yard and the special investigation department of the Post Office police throughout the country is responsible for the improvement.

## Despite Price Rise Tea Still Most Economical Drink

For the past two years people in Canada have been enjoying the lowest price for tea in over a century. This has meant tremendous losses to growers who, to save their industry, have restricted tea exports and caused prices to advance. Tea packers, particularly those supplying very fine quality teas, have reluctantly been forced to increase prices.

## New Radio Telephone

A novel ultra-short-wave radio telephone, sending signals, operating entirely from self-contained dry batteries, which weighs 15 pounds and is capable of sending spoken messages clearly over distances of more than a mile through city streets, has been developed. The wave-length utilized is 100 centimeters or about 39 inches.

## SAVE THE POKER HANDS

## The Safety Of Surgery

Technique So Perfect Now Could Hardly Be Improved

"The operating table is safer than the crowded streets outside," says a noted British surgeon.

Not long ago another surgeon, Lord Moynehan, declared that the technique of surgery is so perfect nowadays that he did not see any way in which it could be improved.

We sometimes read that So-and-So died after an operation. The phrase is somewhat unfortunate, because it carries the suggestion that the operation had something to do with the cause of death. It is not the operation that causes death, but the disease or injury which made the operation necessary. The operation was the only chance of saving the patient's life, and either the operation had been delayed too late, or the injury was too severe. St. Thomas Times-Journal.

India's oldest society, the Asiatic Society of Bengal, recently celebrated its 150th anniversary.

## Worth Fabulous Sum

Russian Crown Jewels May Be Shown At Chicago Fair

The Russian crown jewels, valued at nearly \$250,000,000, and one of the richest treasures of precious stones in the world, will be displayed at the Century of Progress Exposition in Chicago this summer. If the Soviet authorities grant a request they have received from exposition authorities that the gems be lent for the period beginning May 26, when the fair re-opens. The authorities have the request under advisement.

The collection, which is assembled in an isolated storehouse in the State Bank at Moscow and is guarded day and night by Red soldiers includes the crown used at the coronation of Catherine the Great and her successors, which is said by experts to be worth \$52,000,000. Almost 5,000 diamonds, together with a great ruby, go toward making up its weight of pounds.

Producing maple trees on eastern Canadian farms total 70,000,000.

## Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. In any woman who becomes nervous and irritable, has hot flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

## Head Of Canadian Society Of Technical Agriculturists Refers To The Problem Of Production

The March number of "Scientific Agriculture" contains a wonderful address at the annual meeting of the Ontario Agricultural College Alumni Association by Dean A. Hovos, Dean of the Faculty of Agriculture, University of Alberta, and President of the Canadian Society of Technical Agriculturists. In agricultural circles, says "Scientific Agriculture," it has been customary to recognize Dean Hovos of Edmonton as the "Dean of Deans." He is the senior among the heads of agricultural colleges in Canada, both in age and in years of service. While it may be true that some of our technical agriculturists have become swamped with the routine of administrative duties, or the intricacies of scientific investigations, Dean Hovos always keeps before us the needs and the aspirations of that sometimes-forgotten man, the farmer.

The address is an epitome of rural agricultural wisdom embracing as it does the whole gamut of agriculture in actual practice, economics, and philosophy. Speaking of production and marketing the Dean said: "How often one has heard during the past few years the statement 'We have solved the problems of production but we have paid little or no attention to the problems of marketing.' Every time I have had the opportunity, I have raised my voice against this sweeping statement, simply because it is not according to fact. That we have not paid enough attention to the machinery of marketing, I am quite ready to agree; also that one of our major enterprises should always have the proper distribution of our products; but when people say that we have solved the problems of production, I must take exception to no uncertain terms. The fact of the matter is that we, in this far-flung country of ours, are never children in the matter of production. If there has been over-production quite recently, and that is still regarded as debatable, it is absolutely no proof that we have solved the problems of production. Moreover, it must not be forgotten that production is an integral part of a sound marketing system and cannot be divorced. They are as inseparable as Mutt and Jeff, or ham and eggs,—indeed more so."

### Extensive Sound Range

#### Cats Hearing Far More Acute Than Human Beings

If your house cat pricks up his ears in what seems to you a dead silence, don't blame it on his imagination. He may be listening to the footfalls of a mouse a block away.

Proof that the lowliest alley cats can hear and associate sounds far beyond the range of human hearing was presented to the American Otological Society convention at Atlantic City, N.J., by Professor S. F. Dworkin of McGill University.

Cats trained to associate certain sounds with food were exhibited to the group of scientists and the volume of the sounds was progressively decreased far out of the range of the human ear but the cats continued to respond. The sounds were made by an electrical contrivance. Slight variations in pitch which the cats understood from previous experience did not mean food, they ignored.

Human beings can hear sounds of from 12,000 to 20,000 cycles per second, and frequency. The cats respond to frequencies up to 40,000 cycles per second, showing their hearing was more than twice as acute as that of a normal human.

### One Manufacturing Basis

Export production in Canada forms the basis of many of Canada's great manufacturing and processing industries to an extent that is not generally appreciated. In 1931 the last year for which complete statistics are available 9,298 establishments were engaged in manufacturing products of foreign origin. Of this number only 327 were engaged in working with foreign agricultural products, principally rubber, sugar and coffee.

W. N. U. 2043

### To Protect Oil Fields

#### Any Discovered In British Isles Will Be Property Of State

The British government is preparing legislation to insure that any oil fields discovered in the British Isles shall be the property of the state. This procedure is evidently due to the reports that oil has been discovered in the neighborhood of Worthy, in Sussex, at a depth of 1,875 feet.

It is known that some Americans with experience in the oil fields of this continent have been drilling in various parts of England for the last two or three years but apparently the Worth project is the only one that has given indications of success. According to the records, petroleum in commercial quantities has never been found in the British Isles. The enormous deposits of coal might suggest that deep-drilling would produce oil.

By Ruth Rogers

664

GRACEFUL AND SLIM LINED COSSACK TYPE SUIT AND WHAT AN EASY AFFAIR TO MAKE

There's chic and bewitch about this charming Cossack type suit. There's slowness too, contributed by the extra-battened closing. Bright red woolen made the original of this mode. The suit is cut fabric. If your waistline is slim, it is very smart worn with a wide patent leather belt.

Twelve woven in taupe or navy blue woolen with white pencil stripes is most attractive scheme.

Style No. 664 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust. It requires 3 1/2 yards of 27-inch material with 1/2 yard of 27-inch interfacing for collar.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap one carefully.

### A Luxurious Airship

#### Veritable Hotel Of Skies Is Being Built In Germany

The German airship LZ 129, a veritable hotel of the skies, is reported as in an advanced stage of construction. The Berliner Tagelabor published further details of the ship, showing it will place the comforts of a first-class hotel on a level with those of ocean travel.

The central portion of the ship, which will be reserved for passengers, will have cabins, the restaurant and public rooms on the upper deck. The smoking room and the lobbies will be on the lower deck.

The dining room will be 60 feet long, connected with the kitchen by electrically operated dumb-waiters. The windows of the airship will be built in such a manner that the passengers will be able to look down as well as in other directions. There will be a dining room and reading room in addition to the 25 cabins.

Each cabin will have two beds, a cupboard and wash basin with running water. The smoking room will be built in such a manner that passengers may smoke without danger of fire. Next door to it is the bar. The LZ 129 will be driven by four motors of 1,000 horsepower each.

### Sodium Sulphate

#### Saskatchewan Production Showed Big Increase Last Year

Production of sodium sulphate in Saskatchewan increased in value 78 per cent in 1933 compared with 1932, according to a bulletin of the department of industries, issued recently.

Paper pulp manufacturers afford a considerable market for this material, and another valuable outlet is its use in the metallurgical treatment of the nickel-copper ores of Ontario.

Production in 1933 was valued at \$485,416 as against \$271,736 in 1932, an increase of 78 per cent.

### Proved It Was Palatable

There is little chance of liquid air, cooled by 300 degrees below zero, ever becoming a popular soft drink, but just to prove it was palatable Professor J. Satterly, physics department at University of Toronto, quaffed a bowlful of the fluid and breathed out large quantities of foggy smoke. The demonstration was made when the physics department staged an "at home" with Dr. E. F. Burton as host. It was attended by 500 delegates to the Ontario Educational Association.

Lanlathly: "I'm sorry the chicken soup isn't good. I explained to the cook very carefully how to make it, but perhaps she didn't catch the idea."

Boarder: "It tastes to me as if it was the chicken she didn't catch."

## The Scientific Development Of Rust-Resistant Wheat Marks An Epoch In Western History

### Name Little Known

#### German Photographer Who Originated Picture Postcard Is Dead

Alfred Adolph, 80 years old, died a short time ago at Passau, Prussia. He was a German city, but outside of Passau his name meant nothing. Yet his work lives, and will continue to live for a long time. For Alfred Adolph was the originator of the picture postcard.

Fifty-five years ago Herr Adolph, who was a photographer, printed the first postcard souvenirs. Specimens of these are now in the German National Postal Museum. It was really not so simple as it seems, for Adolph had to devise a special press for the business. It was a venture involving outlay and a chance of loss.

The handiwork of picture postcard messages are proverbial. "Having good time with you were here" has become a popular classic. It is really the best of all post card notes for it involves no mental effort. Wiscarack and smart-Alec messages are less meritorious for they carry no joy to the recipient, and if they have ever had a germ of originality they involve a certain amount of brain fatigue for the sender.

On the whole though, the world would be duller without Adolph's picture cards. Everyone likes to know where his traveling friends are and what they are seeing. And it is also true that in this matter he who gives is more blessed than the one who receives, for it affords the sender a chance to brag.

### Should Act As Bracer

#### People At Fifty "Right In Pink" States Doctor

A cheery message for men of 50 is that which comes from Dr. James Cutton co-founder of two Toronto hospitals. He says a man of fifty "is right in the pink." And he adds that age does not mean years in respect to the body. "Some men are old at fifteen; others young at eighty," he says and he declares that a man of fifty, because of his stabilized physique, can endure more than a boy. Perhaps there is not much new in the good doctor's statement but it is a fact that many men of fifty become depressed at the fact that they are growing old. His words should act as a bracer for them.

Clocks and watches having two faces, one at the back and one at the front, are now being manufactured in France.

South Africa expects its 1934 wheat crop to total 3,600,000 bags.

### HAZARDS OF A CAMERAMAN

While one cameraman is being vigorously tackled by an unwilling subject, another "Knight of the Lens" calmly maps the action. This unusual photograph was made in Paris as General Bauld de Fontenay, whose name was mentioned in the Stavisky scandal, charged a photographer who attempted to take his picture.

The discovery of rust resistant wheat marks an epoch in the history of this Western continent. One of the powerful enemies of wheat has been met and conquered. By H. M. Parry, of the Dominion Research Council, states that since 1916 the loss from this parasite has been \$900,000,000. This is in money, \$20,000,000 a year. What it has meant in blasted hopes, in broken men cannot be computed.

Rust has come upon wheat at its flowering time and has flourished best among the thick standing corn. It has swept down in the hot night of July, especially when the rain has washed the heavens blue and made a picture past pulsing of the golden waving grain and the soft silver air. Sucking the sap from the stalk it has left it standing a mockery of emptiness. "The rust has struck!"—that sentence will no more dash the light from eyes and the strength from hotheaded swinging arms.

Ten years ago the Dominion Rust Research Laboratory at the site of the University of Manitoba began this investigation. It got its foundation wheat from Minnesota, and at the Fort Garry site and the Dominion Experimental farm commenced its breeding experiments. When victory dawned in the laboratory, there followed milling and baking tests in which the Universities of Alberta, Saskatchewan and Manitoba and the laboratories of the Dominion Board of Grain Commissioners were called into help.

The careful men of science now state that a wheat has been developed which is practically as good as the Marquis and Bealard. All tests so far have been within the orbit of laboratories. This season will see these tests widened to include commercial concerns. The new wheat will not be distributed until it is certain that it can "take" with the farmer as well as under the sheltered conditions of the experiments. However, it has been discovered that as well as being resistant to rust, the new variety is also better able to withstand other diseases such as smut than are the varieties now in the field.

Incidentally it should not be forgotten that as well as the agriculturists, the scientists of the Rust Research Laboratory and of the prairie universities are open to congratulations. Their victory is not only of enormous practical value but it is victory in the world of knowledge and an outstanding one, both on account of the numbers in other places on the continent who are engaged in this research, but also because of the team work displayed among the "players" and of the devotion for the "side." The total cost of the whole thing is given as \$250,000. As a matter of fact, there are other things which the universities have contributed in time and devotion and what the scientists themselves have contributed in interest of the kind that cannot be bought. Winnipeg Free Press.

### Terrors Of Sargasso Sea

#### Investigator Has Found Seamen's Story Has No Foundation

After several months investigation in the Sargasso Sea, an expert from the Natural History Museum, South Kensington, returned with tangible evidence that there are no horrors in that weird part of the Atlantic. Exhibits were brought back to show that the seamen's traditional story of the Sargasso's impenetrable mass of floating material through which no ship could make its way, has no foundation in scientific fact. The investigator, on his return to England, said the exhibit would prove once and for all to the ordinary mind that the Sargasso's fantasy was pure imagination. There, he stated, vast stretches of floating vegetation extending in green and yellow patches as far as the eye can see, but never thick enough to prevent the progress of a ship.

Temperature of the air decreases gradually up to a distance of about 65 miles from the earth.

## Why Farmers in Distress.

Under the above heading the Seattle Grain Company publishes another bulletin on a comparison of prices between what the farmer has to buy and what he has to sell. The basic years on which these comparisons are founded are the years 1913-14. The April prices of wheat were 66% of the 1913 prices; cattle were 70% and hogs 95%. On the other hand the things the farmer has to buy (146 items) are 27.6% higher than in 1913-14.

"As we have frequently pointed out," says the bulletin, "if a bushel of wheat bought a shirt in 1913, it would now take 2 bushels of wheat to buy the shirt. This means that farmers are able to buy only half the shirts and other articles of pre-war years. And this in turn means that half the workers who make articles for farmers are out of employment."

"When a bushel of wheat will exchange on the average for the same quantity of goods and services as in 1913, then depression will be over in the West."

"A study of unemployment has shown that about one-half of those not working today are normally employed in the manufacture of durable goods. Not such goods as foodstuffs, clothes, tobacco, gasoline, and such daily needs, but in such articles as people do economize on. That is, houses, roads, buildings, furniture, tools, farm implements, plumbing tools, lumber, barbed wire, etc."

"Added to this the majority of the other half of the unemployed are those normally engaged in transportation and distribution of these durable goods, or in producing the raw material for their manufacture."

"For every man put to work on these durable goods, there will be new demand for consumption of goods."

"No class of people is more in need of the durable goods than the western farmer, and the raise of his buying power would automatically put these workers back into employment."

Although the average prices of 146 items in the Seattle index are 27.6% higher than in 1914, there are 24 items that are as low as in the pre-war years. These include: incubators, roping, harness, leather mitts, sweaters, women's dresses and shoes, children's shoes, beans, flour, tomatoes, jam, lumber, etc.

—Vulcan Advocate.

## Alberta Crop Report.

Early wheat in Alberta is showing well above ground and has reached the stooling stage. Germination has been normal in the greater part of the province, with a few patchy districts on account of dryness. The seeding of coarse grains is approaching completion, with some increase in acreage.

The weather for the most part since last report has been very warm and dry, with high winds prevailing over a large part of the province. Soil drifting has occurred in some areas, but generally speaking the damage from this cause has not been great. The central districts of the province have experienced an unusual amount of wind this spring.

The warm dry period was broken by showery weather over a large section of the province during the latter part of this week (May 10), bringing many districts welcome moisture which, though not great in any one area, halted drifting and gave added impetus to the new crop. A number of districts are still urgently in need of moisture.

The warm spell of the past week has brought the grasshopper situation to a head very rapidly in the various threatened areas, and the menace to the young crop growth is serious. The hoppers have hatched out two or three weeks earlier than last year and somewhat ahead of the crop, and extensive damage is likely to be done by the pest in the next few weeks from which the crop could not recover except through the medium of good rains, and then only to a partial extent. The department therefore emphasizes the very urgent necessity of poisoning operations. Ample supplies of bait are on hand at present at the various mixing stations, and the field organization is active in meeting demand for bait.

Precipitation since the last report has varied from light to heavy showers in various areas. Lethbridge district north to Vulcan reports light showers at one or two points. In the Calgary locality there has been little or no rain, but north and east there have been showers varying in degree. Light showers have been reported at a number of points throughout the eastern section of the province. Fairly substantial rains fell in the Red Deer and Lacombe districts, where dry conditions prevailed. Edmonton districts have had substantial rain, and some good showers are reported from north, northeast and northwest of that city.

Sheepmen report a very excellent lambing season, and prices for lambs at present are very good. Hog prices are maintaining a fairly satisfactory level also. There is a good market for horses, and farmers and ranchers having animals for sale have recently shipped numbers of them from the province.

## TENDERS WANTED.

Tenders will be received on or before May 26th for the Erection of the Evangelical Church, Didsbury.

Plans and specifications can be seen at the store of Mr. J. V. Berscht.

Lowest of any tender not necessarily accepted.

## WEDDINGS.

### STAUFER—GOOD.

A very pretty wedding was solemn-  
ized at the Didsbury M.B.C. Church  
on Tuesday, May 15th, 1934, when  
Miss Emma Good, daughter of Mr.  
and Mrs. Ben Good, of Bergen,  
became the bride of Lloyd Stauffer,  
son of Mr. and Mrs. O. W. Stauffer,  
of Didsbury.

At the hour of 10.30 a.m. to the  
strains of Mendelssohn's Wedding  
March played by Miss Glaphia Phipps,  
the bridal party led by the officiating  
clergyman, Rev. C. J. Hallman and  
Rev. A. Traub, assistant, took its  
place at the altar, which had been  
decorated for the occasion with ferns  
and blossoms.

The bride looked pretty in her  
gown of white silk crepe, and carried  
a bouquet of pink carnations. She  
was attended by her sister Ruth,  
dressed in mauve and bearing a  
pretty bouquet of ferns and blossoms.  
Little Marian Good made a charming  
flower-girl as she strewn roses in  
the bride's pathway.

The bride was given away by her  
father. The groom was attended by  
Mr. Lester Stauffer. During the  
signing of the register a very pleas-  
ing solo was rendered by Mr. Harley  
Traub.

After the wedding the bridal party  
with a group of relatives and intimate  
friends enjoyed a reception at the  
home of the groom's parents in  
Didsbury.

After a bountiful wedding break-  
fast the guests, numbering about 60,  
presented the happy couple with  
many useful gifts.

Amidst showers of rice and confetti  
Mr. and Mrs. Lloyd Stauffer left for  
a short honeymoon in the Edmonton  
district. Upon their return they will  
reside on a farm west of Didsbury.  
—Our best wishes to the happy pair.

### DEVOLIN—CORBIN.

The following announcement is  
taken from the "Penticton Herald"  
of May 10:

On Monday May 7 the Anglican  
Church was the scene of a pretty  
wedding when Ivy Maude, second  
daughter of Mr. and Mrs. E. J. Cor-  
bin, Main Street, became the bride  
of Mr. Hugh Norman Devolin,  
youngest son of Mr. and Mrs. J. E.  
Devolin, of Didsbury, Alta.

Becomingly attired in white the  
bride carried a bouquet of pink  
carnations, white stock and maiden-  
hair fern. She was attended by  
her sister, Miss Violet Corbin, who  
wore a blue dress and carried a bou-  
quet of blue iris and blue columbines.

The bride was given in marriage  
by her father, Mr. E. J. Corbin.  
Mr. Manning was groomsmen.  
Mrs. Mangel played the Wedding  
March, and during the signing of the  
register Miss Winsome Brooke sang  
"O Promise Me." Following the  
ceremony a wedding feast was held  
at the home of the bride's parents.  
Mr. and Mrs. Devolin will reside at  
Skaha Lake, Penticton.

## New Cow-Testing Plan.

A dairy herd testing scheme has  
been put into effect by the provincial  
department of agriculture to take  
the place of the scheme carried on  
for some years by the Dominion  
government, but cancelled last year.

Under the new provincial scheme  
provision will be made whereby  
each farmer operating a dairy herd  
may keep records of each of his cows  
and have samples of milk tested  
every two months for butterfat pro-  
duction. The department will pay  
cost of transportation of samples and  
will provide periodical reports on  
the herd from which samples come.

Application forms under the new  
plan are being sent this month to  
all members of former cow-testing  
associations, and to others from  
whom enquiries have been received.  
The new plan will make possible  
continuance of the check upon the  
performance in production of dairy  
cows in the province.

Reduced Prices Effective Immediately  
Custom Hatching 2c per Egg  
Baby Chicks \$7.50 per 100  
All Breeds

Dorham Poultry Farm, Carstairs

## "Kritiks' Korner."

The new sidewalks that the town  
is building are very much appreciat-  
ed.

• • • • •

Although Cleanup Week was quite  
generally observed by all the towns-  
people, still there seems to be plenty  
of boxes, paper and junk lying  
around. The need seems to be for  
proper containers. Paper should be  
burned.

• • • • •

Now that the management of the  
Opera House has found business to  
be good enough to justify the outlay  
of funds to build a fence we suggest  
that the next extravagance they in-  
dulge shall be the purchase of a new  
curtain for the stage—with or with-  
out advertising—preferably without.

• • • • •

The concert given by the Band  
the other night was a great credit  
not only to themselves but to the  
assisting artists and to the town.  
The new uniforms add much to the  
appearance of the organization. In  
fact the impression we received was  
so good that it seems a shame to  
criticize. We will limit ourselves  
therefore to this one suggestion:  
that some of the "Boys" learn to  
sit up a little straighter and keep  
their feet on the floor—and let the  
audience do the "stamping."

• • • • •

Milk cows that are allowed to  
run loose or that are picketed too  
close to the sidewalk in some parts  
of the town are becoming somewhat  
of a nuisance. They not only break  
the sidewalk, but make it disagree-  
able for pedestrians.

Where does your merchant  
keep PERISHABLE Food?

YOU'RE probably a bit "fussy" in your home  
about the foods you serve, careful to guard  
them from discoloring, bacteria by correct refrigeration below 50 degrees from the moment they enter  
your home, because you know that unless perishable  
foods are protected from the heated atmosphere they  
quickly lose their freshness and may endanger health.

DOES your merchant safeguard the foods which  
you purchase by using Electric Refrigeration,  
or IS YOUR FOOD IN DANGER before it even reaches  
your home?

NEXT time you go shopping for food why not look  
around the store and see if you are getting this  
definite assurance of freshness. YOU'RE ENTITLED  
TO IT.

## BASEBALL.

### ROSEBUD LEAGUE

#### Didsbury 8 Hainstock 7

Twenty-six strikeouts featured a  
close ball game Monday night when  
Didsbury defeated Hainstock 8-7 to  
claim their first win of the season.  
George Hardy went the route for  
Didsbury and twirled a fine game.  
With better support he would have  
won his game by a score of 8-2, as  
5 of the visitors' runs were unearned.

Hainstock scored once in the first  
inning, but Didsbury came back  
in their half of the frame to tally  
3 runs and from then on were never  
headed, though Hainstock twice  
came close to tying up the game.

In the 9th stanza with the score  
8-5 against them Hainstock went out  
to even up the game. Three hits in  
a row scored 2 runs and put the tying  
run on 1st. Didsbury's Ross batted  
out a hot drive which Buhr speared,  
tagged the runner and then threw  
to 1st base to complete a snappy  
double play and cinch the game.

Both teams showed lack of prac-  
tice, Hainstock contributing 4 errors  
to 8 by Didsbury. The locals got  
9 hits, including a triple by Woodie,  
while the visitors got 7 singles, with  
2-baggers by Miller and Patmore.

### Burnside Notes.

Mr. Vivian Jenkins has been help-  
ing Mr. Noah Eckel for a week.

Mr. Dietz spent a couple of  
days at his home here this week.

Mrs. A. Jenkins and daughter Miss  
Una spent Tuesday in Calgary.

Mr. Will Saunders and Mrs. Geo.  
Saunders were weekend business  
visitors in Calgary.

Mrs. Leon Doll and Cecil Cipperey  
spent Monday with their parents  
Mr. and Mrs. C. L. Cipperey.

Mr. and Mrs. A. E. Thompson  
Junior and son Donald, Mrs. A. E.  
Thompson Senior and Mrs. Joe Clark  
were weekend visitors to Calgary.

Miss Bertie and Mr. Fred Metz,  
Miss Edna Stotler and Mr. Earl  
Dedels were Sunday dinner guests  
at Mr. and Mrs. Otto Bittner's.

Mrs. George Saunders was the  
holder of the lucky ticket which won  
the quilt in the raffle and whisky drive  
given by St. Anne's, May Society,  
Didsbury, on Monday evening. Mrs.  
Chas. Mardon was the seller of the  
ticket.

### Mountain View Notes

Mountain View W.C. met as usual  
on Thursday last in the Community  
Hall. Mrs. Harry Pearson presided  
and the members had the opportunity  
of hearing Mrs. Hasegood, district  
conventioneer, who made a happy little  
speech in her usual bright manner.  
The members arranged for a tea to  
be held in Didsbury on June 2nd.  
The subject of Home Economics was  
given by Mrs. J. Vorrall, who  
brought out many interesting points  
in the art of bread-baking. The prize  
for the ticket draw at tea was  
won by Mrs. Hasegood. The meet-  
ing adjourned with the singing of  
the National Anthem, and refresh-  
ments were served by Mrs. McNeil  
and Mrs. Clarke.

Mr. and Mrs. D. Wilson were  
visitors in Mena district Sunday.

for the coast where he will spend a  
vacation for a few months.

Mr. Henry Klassen of Herbert,  
Sask., is visiting his brother, Mr.  
Barney Klassen.

Mr. and Mrs. A. Orde will hold a  
Dance at the Springdale School on  
Friday, May 25. Everybody Wel-  
come. (20p)

Mr. Jack Currie, of the Jenkins'  
Grocery, Innisfail, visited his  
home here over the weekend.

Miss Margaret Ranton of the Bank  
of Montreal, Lacombe, spent the  
weekend with her parents, Mr. and  
Mrs. E. G. Ranton.

We have a fresh supply of scratch  
pads now ready. Especially useful  
for school, store or telephone.  
2 for 5 cents.—Pioneer Office.

Rev. A. J. Mitchell and Dr. Clarke  
went to Edmonton this week to at-  
tend the Alberta Conference of the  
United Church of Canada.

A meeting of the Canadian Legion  
will be held this Saturday, May 26,  
when an address will be given by  
Gourde Walsh of Red Deer.

Mrs. Nixon of Edmonton, visit-  
ing her sister Mrs. J. L. Clarke,  
last weekend. She returned home  
with Dr. and Mrs. Clarke, who drove  
to Edmonton on Monday.

ANIMAL BUILDER—A Mineral  
Stock Food That Builds Bone  
and Health in Every Kind of Animal, at  
24 45 per 100 pounds. See—  
Henry Goehring (20c)

There will be no Lutheran services  
either at Didsbury or Westcott on  
Sunday, May 27, since the pastor  
is going to serve the field east of  
Brisker on that day.

The degree of Doctor of Divinity  
was conferred on Rev. A. E. Hayes  
at the convocation at the University  
of Alberta last week. Mr. Hayes  
was formerly minister of the Knox  
United Church here.

Mr. Chas. Mortimer's flower garden  
is getting to be an interesting  
spot with flower lovers. The suken  
rock garden is attracting much at-  
tention, and another interesting  
feature is a number of native ferns  
which he collected from S. B. Beach.

A carload of bridge timbers was  
unloaded at Didsbury this week  
by the provincial department of  
public works. The timber will be  
used to replace the bridge in the  
Rupp Coulee and to repair the  
bridge on the Little Red at W. Davis'  
place.

The Young Married Women's  
Bridge Club was entertained at the  
home of Miss N. Wilson on Monday  
evening. Honors were shared by  
Mrs. McFarquhar, Mrs. Marcellus  
and Miss Schuller. The next meet-  
ing will be held at the home of the  
latter.

The town was entertained Satur-  
day evening by the band giving an  
open air concert on the C.P.R.  
ground. Cars were parked all round  
the lot and the crowd greatly ap-  
preciated the music. The boys  
made a snappy appearance in their  
new uniforms when they marched to  
the school after the concert.

Last Wednesday evening the Bow-  
den Creamery was broken into and  
the office safe, with contents around  
\$80, taken away in it, also a lot of  
slips and personal papers. The rob-  
bers came in the back door of the  
creamery, then broke the door into  
the office. Police have been working  
on the case ever since, but so far  
have not been able to locate any-  
thing.—Innisfail Province.

Mr. and Mrs. Boutin placed their  
home at the disposal of St. Anne's  
Altar Society on Monday evening.  
Ten tables of whist were played, the  
winners being: Mrs. Macdonald,  
ladies 1st; Ted McEwen, gent's 1st;  
Mrs. LeClaire, ladies consolation,  
and Mr. Boutin, gent's consolation.  
The holder of the lucky ticket on the  
quilt was Mrs. George Saunders.  
Sunnyside Dancing was enjoyed  
to the music of Miss Evelyn Brooks,  
and Messrs. Tom Shuman, Robert  
Nelson and Jack Edwards.
